

MERCURY

A POOR CRUTCH.

Experience is a dear teacher, as those who pin their faith to Mercury find out sooner or later. This powerful poison combined with Potash, is the treatment generally prescribed for Contagious Blood Poison, but failure and disappointment is the invariable result. These minerals drive in the sores and eruptions, and apparently the disease is gone and the patient believes the cure permanent, but soon learns better when the old symptoms return almost as soon as the treatment is left off. You must either keep the system saturated with mercury or endure the tortures of sore mouth, ulcerated throat and the mortification that one naturally feels when the body is covered with disgusting sores, rashes, copper-colored spots and other aggravating symptoms of this vile disease.

Mercury and Potash are poor crutches, and their use eventually breaks down the constitution, ruins the digestion and cause the bones to decay. S. S. S., a guaranteed purely vegetable remedy, is the only antidote for Contagious Blood Poison. It destroys every atom of the deadly virus, overcomes the bad effects of the mercury and cleanses the blood and system so thoroughly that never after are any signs of the disease seen. Nor is the taint ever transmissible to others.

We will send free our book on Contagious Blood Poison, which is interesting and contains full directions for treating yourself. Home. Medical advice or any special information desired given without charge.

THE SWIFT SPECIFIC CO., ATLANTA, GA.

down the Bloomfield canyon and camped at the lower ditch for midday meal. The mode of locomotion was by bicycles, upon which they carried bed, cooking utensils and provisions. The women wore Chihuahuas hats, sweaters and bisected pantalettes. Making a few purchases here they proceeded on their journey.

SANTA FE.

The wedding of Miss Sallie B. Van Arsdell and W. H. Wallace of Denver, took place at the Presbyterian church at 8:30 o'clock Wednesday night. The ceremony was performed by the Rev. W. Hayes Moore, pastor of the Presbyterian congregation of this city. The attendants were Miss Sallie Palmer and W. L. Van Arsdell, a brother of the bride. There were quite a number of guests who witnessed the ceremony. Mr. and Mrs. Wallace will make this city their home.

Dr. John A. Brinkley of Kansas City, who has been in Santa Fe for several weeks past as a rheumatic patient, contemplates spending a few weeks at New Mexico's noted Sulphur springs.

A farewell reception was tendered at the residence of Mrs. Eliza Call on Washington avenue to Mrs. Besse Wise, who left over the Denver & Rio Grande for Arroyo Hondo, where she will have charge of the Presbyterian mission school. The evening was devoted to vocal and instrumental music.

Mrs. M. A. Otero and Miss Nina Otero will leave for Chicago, Saturday or Sunday next. They will accompany Miss Anita Bergere as far as Chicago, thereafter the latter will go to the Mother House of the Sisters of Charity of St. Joseph at Mt. St. Clement near Cincinnati, Ohio, where she will resume her studies. Mrs. Otero and Miss Otero will remain a few days in Chicago, thence returning to this city.

New Assemblies Next Summer.

Several new assemblies are projected for next summer. Congregationalists have just decided to establish one and there is a possibility that Episcopalians may do the same. Many people express preference for morning study during their vacation, rather than for place where there is nothing but idleness. The Congregational venture comes from the west, and is now searching for a location where land can be bought and buildings erected. Systematic Bible study and missionary propaganda are to be the two topics upon which emphasis will be laid. It is expected that Methodist Protestants and United Brethren, the two bodies with whom Congregationalists are seeking to unite will come into the new summer assembly plan. The location of the new grounds is likely, it is said, to be in Michigan or Indiana.

There are to be two ships - not one, as first planned - to carry the delegates to the world's Sunday school convention, to be held in Jerusalem. Both are to be large ships, the Grosvenor Kufus and the Furst Bismarck, and one will carry the American delegates and sail from New York on March 18 next and the other will carry the English delegates and sail from Liverpool on April 1 next. Interest in the project increases on both sides of the Atlantic. The American ship is almost filled, but it is announced that a few vacancies in state quotas are to be had. The Canadian quota is filled. The route of these ships, apart from the visit to the Holy Land is exceedingly attractive, and sessions of the convention are to be held on board. Outside the walls of the Holy City a tent will be pitched and here will be held the regular convention of Sunday school workers of the world.

MEN FROM KANSAS CITY.

They Go West to Work on Tucumcari Line. Sixty experienced tracklayers were sent from Kansas City to Amarillo, Texas, last night by the Rock Island railway, says the Kansas City Times. These men will join a construction crew which is gathering at Amarillo to resume work on the Rock Island cut-off from Amarillo to Tucumcari. Work was suddenly ordered discontinued on this line a few weeks ago and it was rumored that the road would not be built. No reason was ever assigned for discontinuing the work. The cut-off is 112 miles long. It will be several months before the road is ready for operation.

GONE TO COLORADO.

New Mexico Scientist Accepts Position in Centennial State. Prof. T. D. A. Cockerell, New Mexico's foremost scientist, recognized in biological circles as the leading authority in America on scale insects, has gone to Colorado Springs to accept a position in the biological department of the college there. The loss to New Mexico is great, as Professor Cockerell is by voluminous and exact writings did much to advance the interest of biological science in New Mexico before the eyes of the scientific world. The gentleman's writings were printed in every Euro-

pean as well as American tongue and his opinions were quoted with authority in every scientific school of standing in the world.

Child Coughs Up Wrench Swallowed Months Ago.

Eight months ago little Ethel Crawford, the 5-year-old daughter of J. J. Crawford of El Paso, swallowed a small monkey wrench, which was among the toys given her last Christmas. Since at time she has been under the care of physicians and treated for asthma. Wednesday, during a violent fit of coughing the little one coughed up the small toy, which had evidently been lodged in her bronchial tubes since last Christmas. The case has excited much interest among physicians.

WORKING ON DALLAS LINE.

Till It Is Ready the Rock Island Will Use Santa Fe Tracks.

Work on the Dallas extension of the Rock Island railroad from Fort Worth has been resumed. A big force of men accompanied by a regular work train is making headway on the approaches to Dallas. It was announced recently that the Rock Island would temporarily use the Santa Fe track in getting in and out of Dallas. This was confirmed by General Superintendent L. B. Hoey. Use of the tracks means also that the Santa Fe station is to be used.

PLANT LOCUST TREES.

Pennsylvania Modifies the Western Catalpa Plantation Idea.

In recent years the railroads of the country have entered into all manner of outside enterprises, with a view to bettering their conditions, physically and otherwise, but the latest of these ventures is attracting more than ordinary attention in the railroad world. The information was given out yesterday that the Pennsylvania system had decided to supply its own material for railroad ties, and with this end in view the construction department had arranged to cultivate 50,000 young locust trees along the right of way of the middle division of the road. The company owns a large number of tracks of land along its lines in the middle division, both east and west of Pittsburgh, and it is the intention that this property shall be used in the raising of timber for the use of the road.

For several years the railroads have been confronted by a shortage of wood on ties, and the problem has grown so serious that many of the roads have discussed the matter in their annual reports. The forestry commission has complained that the destruction of the forests of the country has resulted in droughts and various organizations have insisted that the forests be preserved, but at the same time they have failed to show the railroads engaged in extending and improving their lines how they can get necessary material without destroying the trees.

MYSTERIOUSLY DISAPPEARS.

Young Lady While Visiting in El Paso Suddenly Vanishes.

Yesterday a great excitement was caused by the sudden and mysterious disappearance of a young lady, says the El Paso Times. The lady in question arrived in El Paso Sunday night from the White Oaks country with two girls a few years older than herself. The three were to return home yesterday, having purchased round trip tickets for this purpose. However, none of them have started back, as the two now here have been waiting for their friend who cannot be found high or low. The latter is the daughter of a well-known citizen of New Mexico and last night a wire was sent to her father advising him of his daughter's disappearance. He is expected in El Paso today. The police were notified and though the young lady has gone over to Juarez, but diligent inquiries in both cities failed to elicit any information as to her whereabouts, and as a consequence her friends are very anxious. When she left them she offered no explanation or excuse and it was then thought that she would immediately return.

A singular incident is that a young man of this city is also missing and some entertain the opinion that they have gone off together to get married. The only ground for this supposition is that they were well acquainted and disappeared about the same time. One report is that the girl's parents were opposed to the match, while another is that the young people were mere friends and never intended anything serious.

Navajos All Right.

The agitators who are continually stirring up strife about the "poor Indian" and help the yellow journals to fill up columns with barrowing tales of the Indians' distress cannot very well inflict upon the public any such stuff this winter, for material will be very short. The Navajos have crops that will yield abundantly; their stock

is fat; the range has feed in plenty, and the braves and their families can lay around the hogans all winter and feast. Now, if some busy-body, with intentions of bettering the conditions of the Indian - with "hot air" - does not fill their heads with the idea that the trading post is a hold-up game and they are a much persecuted race, the Indians will enjoy a season of contentment and plenty. Speaking of the trading post, there are many instances where the trader has been more than a friend to the Indian and kept hunger away from the hogan, while red-tape at Washington held back his rations - Winslow Mail.

NOTICE OF SALE.

Whereas, W. C. Buttman and Charles H. Howe, doing business under the firm name and style of the Albuquerque Brick Company, did, on the 13th day of October, A. D. 1899, execute and deliver to the First National Bank of Albuquerque their certain chattel mortgage of that date, which said chattel mortgage was on the 16th day of October, 1899, duly recorded in volume F of Chattel Mortgages, page 19 in reference to which is hereby made and made a part of this notice, and thereby, then and there, conveyed to the said First National Bank of Albuquerque, all the sheds, buildings, boilers, engines, brick machines, and other appliances for the manufacture of brick and other clay products, situated upon the tract of land leased by said Buttman and Howe from Mary E. Howe, situated in the County of Bernalillo and Territory of New Mexico, and known as all that portion of Lot Four (4) of Section Five (5), Township Nine (9) North, Range Three (3) East, which lies east of the Atchison, Topeka and Santa Fe Railroad; which said chattel mortgage was given to secure a certain promissory note of even date therewith for the sum of Fifteen Hundred Dollars, due one day after the date thereof, with interest from date at the rate of twelve (12) per cent per annum until paid, with ten per cent additional on amount unpaid if placed for collection in the hands of an attorney; and

Whereas, said promissory note is long past due and there is now due thereon the sum of Fifteen Hundred Dollars, together with interest as aforesaid from the 13th day of March, 1903, together with attorney's fees as aforesaid; and

Whereas, the said First National Bank, under the terms and conditions of said mortgage, has taken possession of the above described property for the purpose of selling the same in accordance with the terms of said mortgage;

Now, therefore, notice is hereby given that on Saturday, the 26th day of September, 1903, at the hour of ten o'clock in the forenoon, upon the above described premises, the undersigned will sell the above described personal property at public auction to the highest and best bidder for cash, in accordance with the terms of said chattel mortgage, and for the purpose of paying the amount due on said promissory note as aforesaid, together with the costs and expenses of advertising and sale of said property.

FIRST NATIONAL BANK OF ALBUQUERQUE.

By McMillen and Reynolds, Attorneys.

MARKET LETTER.

Special Correspondence.

Kansas City, Mo., Sept. 7.—Receipts at Kansas City last week were 53,811 cattle and 7,392 calves, against 56,131 cattle and 8,285 calves the same week last year. Proportion of quarantines was light, helping market for butcher cattle on native side. Fat steers sold all week, and made a small gain. Top fat steers brought \$5.60. Good cows sold 10 and 20 cents higher, but shelly canners remain low. Most grass cows brought \$2.25 to \$2.50. Veal calves are still at the high point. All kinds of stockers and feeders above the common grades had a good week, and prices stiffened up notable on the best demand of the season. Seven hundred and twenty-five cars went out to country feed lots. Attendance of country buyers was excellent, and an assured corn crop of from 60 to 80 per cent in all the states in Kansas City territory supports a firm market. Choice feeders gained 15 to 25 cents. Majority of sales are from \$3.25 to \$3.75 for westerns. Today's run is 20,000 head, and prices are steady to 10 cents lower. Best fat cattle are steady, cows are lower, and stockers and feeders are about steady, being supported by the usual good Monday's demand from speculators.

Sheep run last week was the best of the season at 29,863 head, against 35,138 head same week last year. Liberal orders for feeding sheep and lambs helped the market, and all grades of sheep were steady. Lambs gained 10 to 16 cents for weights over 60 pounds, but others were weak. The Austen lambs, from Soda Springs, sold at \$4.40 for the killing end, and feeding end brought \$3.30. Feeding lambs brought \$4.10, and breeding ewes of good quality continue higher than fat ewes, the latter bringing \$3.00, and breeding ewes \$3.25. Feeding buyers took about 18,000 head on the run last week, or nearly half, indicating the strength they lend to the general market.

Trade in horses last week was mostly in ranges, 550 head being sold here at retail, principally for country points. Quality was ordinary generally, and prices were from \$25 to \$35. The largest sale of range horses of the season at Kansas City will be held today, when 800 to 1,000 head will be disposed of at auction. A good line of buyers is in attendance.

PRINTING

There are different kinds, to be sure. Moreover the quality of stock on which it is done must be considered if you would create a good impression of yourself amongst your customers. You might think it would not make any difference, but if public opinion on that point was weighed you would find that it is quite a factor in drawing trade. Don't be behind the times. If you want to keep pace with civilization, you must follow customs which is naturally the greed of every man, now-a-days, who has genuine pride. The art of printing is something that few people can acquire. They may print, but the art is not present. Again, the art may be there, but the stock on which the printing is done is of the poorest quality, which entirely obliterates the art that would otherwise be apparent. Then again, the quality of ink and nicety and distinctness of color used are something that counts in bringing out beauty of art into display. The CITIZEN printing department carries nothing but the best quality of stationery, such as letter heads, note heads, bill heads, etc., as well as the finest of ink, and turns out daily evidence of the finest workmanship in the city. If you want cheap, tacky-looking printing, go to the places where you can obtain it; but if you want first-class printing, send it to The CITIZEN printing department, or telephone to us and we will call and give you order.

RULING

requires an exactness that is much admired when accomplished. If your blank books are ruled properly they will always look neat, if in the hands of a first-class book-keeper. If they are not ruled with exactness they will never look neat, even though handled by an artist in book-keeping. To be exact requires skill and patience, which is acquired by long experience and perseverance. When a person possesses his services are in demand in any first-class bindery. The CITIZEN has a first-class bindery and therefore employs the best skill.

Bill heads, letter heads, note heads, vouchers, invoices and blanks of every description are ruled with the same skill and neatness as the finest blank book that was ever turned out. If you want such work telephone to The CITIZEN.

BINDING

is everlasting when properly done. Every business man would like to preserve his books, but he cannot do it when they are in a dozen pieces after he uses them up. He does not want them to break, neither does he want them to be tight in the fold, if so, they cause him great inconvenience. There is much in the way a book is sewed. If it is not sewed properly the breaking of a single thread will occasion an entire section of twenty pages to come out, necessitating the rebinding of the book, causing loss of time and inconvenience. If you want a good blank book you should get one with a patent flat-opening back, thereby enabling you to utilize all the space in the fold, that you would otherwise not be able to do. Then the quality of paper used is just as essential in turning out a fine book as is the workmanship. The CITIZEN carries a full stock of the finest ledger paper manufactured. When you want any kind of a fine blank book telephone to The CITIZEN and our representative will call.

Advertising

The word itself is exhilarating to a man that has a high ambition, whether socially, financially or otherwise. It is the same with a business man. He has to obtain advertising in some way before he will be successful. There are different degrees of success. The more advertising you get the greater amount of business you transact, a fact that non-advertisers admit themselves. "All things do not come unto man." He has to go after them. If he wants advertising he pays for it just the same as any commodity. You may say some men obtain advertising for nothing, but the don't. They pay for it in an indirect, if not a direct way. Thus every man pays for his share. The world owes a man a living, but he has to earn it, and if a man wants advertising he must pay for it. It is better to pay in a direct way and obtain more results than to pay in an indirect way and obtain fewer results. The direct way for a business man to advertise is to talk to the people through an advertising medium that has a place by the fireside of every home within his field for business. The CITIZEN has that place and will always have it.

If the ability of its readers to buy articles of luxury as well as articles of necessity is questioned, then forever will The CITIZEN defend them. Regarding the comparative value of morning and evening papers, it is a fact that a morning paper is before its readers but for an hour or so, while an evening paper is before the public from 5 o'clock until bedtime, and is read by men who labor all day and who have no time to read the morning papers. Therefore the superior value of an evening paper over the morning paper as an advertising medium is quite evident.

The CITIZEN is a home paper. Why? Because the residence portion of the city being not more than ten minutes' walk from the business center, the business man has ample time to read the evening paper before going to lodge or to the club, and he does so. When he has finished reading his paper it is left at home and thoroughly read by the other members of his family.

The ladies of Albuquerque read The CITIZEN, and as it contains all the news, both foreign and local, why should it not command the circulation that it does? If you want results advertise in the

Grove's Tasteless Chill Tonic

has stood the test 25 years. Average Annual Sales over One and a Half Million bottles. Does this record of merit appeal to you? No Cure, No Pay. 50c.

Enclosed with every bottle is a Ten Cent package of Grove's Black Root Liver Pills.
